

Industry Talk Series 2022

Industry Talk with

CSIR

Touching lives through innovation

15 SEPT
2022

12h00 – 13h00

Presenters

DR KITTESSA RORO - Research Group Leader: Energy Supply and Demand

Topic: Overview of the CSIR Energy Centre

SYNOPSIS: The CSIR Energy Centre provides the scientific expertise and essential research infrastructure necessary to address South Africa's growing energy needs and the associated industrialisation opportunities for new products and services. It provides thought leadership, innovation and capacity building to address the two main energy imperatives of energy-efficiency and cleaner energy. The Centre's activities are guided by global trends whilst being mindful of local realities focused on developing a sustainable energy system.

MUHAMMAD SHEIK - Candidate Engineer

BIO: Muhammad Sheik is a candidate engineer at the CSIR Energy Centre and specialises in the optimisation of thermal systems. He graduated from UKZN with a BSc in Mechanical Engineering (*Cum Laude*) in 2018. Muhammad was part of the CSIR Graduate-in-Training program from 2019 to 2020. He is registered as a candidate engineer with ECSA.
