

Computer Science Industry Seminar Series 2022

TECH Talk with

25 OCT
2022

12h00 – 13h00

Presenters

SID BWERINOFA - Technology Lead

SYNOPSIS: BSG consultants from Data and Analytics capability will share a case study that helped address an important problem for a client using machine learning technology. He will explain first principles of AI/ML and give the students practical experience on how they could use similar technologies/tools and projects to build their own projects.

IVHANI MASELESELE - Senior Developer

SYNOPSIS: BSG is a proudly homegrown South African consulting and technology company. Our purpose is being a proactive force for positive change. The center of our 'difference' is our people. Our selection process is a two-way conversation and we look forward to sharing more with you.
